TRADITIONAL EXTERIOR WOODSTAINS AND FINISHES
Borma Naturaqua Line

Waterborne Exterior Woodstain
NATURAQUA HOLZ LASUR

Ideal for protection and wood coloration

A waterbased protective and decorative woodstain for interiors and exteriors which colours the wood and enhances the grain. Colours are light resistant due to the inclusion of UV filters whilst special additives provide efficient protection against fungi and insects. Good resistance to atmospheric agents.

Recommendations for application:
To optimise the lifespan of the coating it is recommended that a finishing coat of Naturaqua Top Gel is applied. Recommended application: brush, spray, dipping.

Customizable with Borma Colour System

Decorative Exterior Finish
NATURAQUA TOP GEL

Waterbased Top Coat

A flexible, transparent and odourless waterbased waxy acrylic perfect for exterior use. Thanks to the high solid content, it enables a substantial protective film to be applied. It guarantees efficient protection against UV radiation. Available: matt and semi-gloss.

Recommendations for application:
If necessary, the product can be diluted with water, however to preserve the technical features of the coating, the quantity of water must not exceed 10%.
