

PATINAS & AGING PRODUCTS

Ageing Vehicle
HOLZ ANTIX 2008

A colourless waterbased vehicle used on woods with high tannin content to get an instant aged effect. The intensity of the effect shown by the darkening of the colour, depends on the natural content of tannins of the wood. It is not a stain. It can be tinted with the special waterbased Mordant Concentrates. If overcoated with waterbased products it can show yellowing phenomena. To avoid yellowing we recommend oil-based finishes, waxes or traditional products as topcoats.

Recommendations for application:
Apply the product on raw wood using synthetic brushes or sponges. A preliminary test is always recommended to verify the final effect, which is directly related to the wood. To get a lighter effect it is possible to dilute the product in water, in the desired ratio.

Dyes
MORDANT ACTIVE STAIN CONCENTRATES

Concentrated liquid dyes in water solution specifically for colouring raw wood used in combination with the different waterbased vehicles in the Borma range and in particular with Holz Antix 2008 and TP1050 Vehicle for Positive Stains. They provide great depth and opacity. The colours are available in 100 ml sized standard bottles. The final colour is dependent on the wooden background.

Recommendations for application:
To avoid mis-tinting it is recommended to add the concentrates to the clear vehicle drop by drop till the right intensity is achieved. Always make a preliminary test to verify the final effect.
